

A referral you can stand behind.

One-to-one STEM tutoring and mentorship from one engineer-mentor.

WHO THIS FITS

Gifted, twice-exceptional, and bright-but-struggling students in grades 6-12, with the deepest work in high school. Sessions are fully remote and available nationwide.

- Ability and school performance tell two different stories.
- An AP or honors STEM foundation cracked several chapters back.
- A capable teenager's engagement has faded despite conventional support.

WHAT THE PARTNERSHIP INCLUDES

- Targeted tutoring, engineer-led enrichment, and personal mentorship in one engagement.
- Every Zoom session is recorded and transcribed; AI models Matt built analyze the full transcript rather than relying on memory.
- A same-night family summary plus a typeset worked-solutions packet of every problem solved together.
- A semester family review; with consent, periodic notes for the referring professional.
- One mentor throughout: no marketplace, bench, subcontractors, or handoffs.

WHAT A REFERRAL LOOKS LIKE

- 01 Make the introduction**
Send the family to the site or email Matt directly.
- 02 Matt replies personally**
The family receives an honest read on fit within 24 hours.
- 03 Confirm the fit**
A 20-minute conversation maps goals, working style, and next steps.

INVESTMENT

Weekly engagements begin at \$800 per month and scale with cadence. Month to month, no contracts. The practice stays deliberately small: every session is prepared for in advance and reviewed afterward.

ONE PERSON. NO BENCH.

Recorded one-to-one mentorship hours

CLEAR SCOPE

Academic tutoring and mentorship only - not therapy, diagnosis, or evaluation.

When evaluation or clinical support is needed, the family is referred to an appropriate professional.

CLEAN REFERRALS

No referral fees are paid or accepted in either direction.

With family consent, the referring professional can receive periodic progress notes.

The mentor the family meets is the mentor their student keeps.
